DOCKET FILE COPY ORIGINAL

In the Matter of
Proposal for Creation of the Low Power FM
(LPFM) Broadcast Service

FCC RM-9242

Comments of George W. Crawford

I have been requested by CEO of the Penn State - McKeesport Campus to file our comments in support of RM-9242 as currently amended. The stated goal of the Petition is to "create opportunities for individuals, minorities, women, small business and others with limited financial means to own" and operate "low-power FM broadcast stations...". It is our firm belief that an implementation of this Proposal would accomplish that goal.

80% of the students at Penn State - McKeesport Campus live within a five mile radius of the Campus. As such, the proposed power levels listed in RM-9242 would permit adequate coverage of the student population during periods of bad weather or simply to notify them of current happenings on Campus.

It is our declared intent to actively pursue a Part-73 primary service Station / LPFM-1 license if this Proposal is approved.
